

I am respectfully urging the FCC to reject the NAB's petition 04-160 restrict XM Satellite Radio along with their traffic and weather channels. I pay for and use this service while traveling where I can't get this info elsewhere. Along with the variety and quality of music and what else they offer that I cannot get anywhere else. What's happening to our First Amendment. With the way things are going we will no longer have this choice. Please listen to the users of this great service...

Thank you,

Bonnie Cotton
